

MODULE

PROGRESS

	<div>Introduction to Academy</div> <div>8 Sections Fundamental General</div> <div>This module is recommended for new users. It allows users to become acquainted with the platform and the learning process.</div>	<div>100% Completed</div> <div></div>
	<div>Linux Fundamentals</div> <div>18 Sections Fundamental General</div> <div>This module covers the fundamentals required to work comfortably with the Linux operating system and shell.</div>	<div>100% Completed</div> <div></div>
	<div>Windows Fundamentals</div> <div>14 Sections Fundamental General</div> <div>This module covers the fundamentals required to work comfortably with the Windows operating system.</div>	<div>100% Completed</div> <div></div>
	<div>Introduction to Networking</div> <div>12 Sections Fundamental General</div> <div>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</div>	<div>100% Completed</div> <div></div>
	<div>Network Enumeration with Nmap</div> <div>12 Sections Easy Offensive</div> <div>Nmap is one of the most used networking mapping and discovery tools because of its accurate results and efficiency. The tool is widely used by both offensive and defensive security practitioners. This module covers fundamentals that will be needed to use the Nmap tool for performing effective network enumeration.</div>	<div>75% Completed</div> <div></div>
