

MODULE

PROGRESS

<div><div>Intro to Academy</div></div>	<div>Introduction to Academy</div> <div><div>8 Sections</div><div>Fundamental</div><div>General</div></div> <div>This module is recommended for new users. It allows users to become acquainted with the platform and the learning process.</div>	<div>100% Completed</div> <div></div>
<div><div>Linux Fundamentals</div></div>	<div>Linux Fundamentals</div> <div><div>18 Sections</div><div>Fundamental</div><div>General</div></div> <div>This module covers the fundamentals required to work comfortably with the Linux operating system and shell.</div>	<div>100% Completed</div> <div></div>
<div><div>Windows Fundamentals</div></div>	<div>Windows Fundamentals</div> <div><div>14 Sections</div><div>Fundamental</div><div>General</div></div> <div>This module covers the fundamentals required to work comfortably with the Windows operating system.</div>	<div>100% Completed</div> <div></div>
<div><div>Introduction to Networking</div></div>	<div>Introduction to Networking</div> <div><div>12 Sections</div><div>Fundamental</div><div>General</div></div> <div>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</div>	<div>100% Completed</div> <div></div>
<div><div>Network Enumeration with Nmap</div></div>	<div>Network Enumeration with Nmap</div> <div><div>12 Sections</div><div>Easy</div><div>Offensive</div></div> <div>Nmap is one of the most used networking mapping and discovery tools because of its accurate results and efficiency. The tool is widely used by both offensive and defensive security practitioners. This module covers fundamentals that will be needed to use the Nmap tool for performing effective network enumeration.</div>	<div>100% Completed</div> <div></div>
<div><div>Learning Process</div></div>	<div>Learning Process</div> <div><div>12 Sections</div><div>Fundamental</div><div>General</div></div> <div>The learning process is one of the essential and most important components that is often overlooked. This module does not teach you techniques to learn but describes the process of learning adapted to the field of information security. You will learn to understand how and when we learn best and increase and improve your learning efficiency greatly.</div>	<div>100% Completed</div> <div></div>
<div><div>Login Brute Forcing</div></div>	<div>Login Brute Forcing</div> <div><div>11 Sections</div><div>Easy</div><div>Offensive</div></div> <div>Learn how to brute force logins for various types of services and create custom wordlists based on your target.</div>	<div>100% Completed</div> <div></div>

Web Requests

8 Sections Fundamental General

This module introduces the topic of HTTP web requests, and how different web applications utilize them to communicate with their backends.

100% Completed

Introduction to Web Applications

17 Sections Fundamental General

In the Introduction to Web Applications module, you will learn all of the basics of how web applications work and begin to look at them from an information security perspective.

41.18% Completed

Attacking Web Applications with Ffuf

13 Sections Easy Offensive

This module covers the fundamental enumeration skills of web fuzzing and directory brute forcing using the Ffuf tool. The techniques learned in this module will help us in locating hidden pages, directories, and parameters when targeting web applications.

100% Completed
